

2014

New Look for invoices & statements

Pacific Color Lab has installed a new business system as of Jan. 1st, 2014. Our old system that was supplied by Kodak had become obsolete, as Kodak & Microsoft no longer supported the software with fixes & updates.

The new system has a different look for your invoices & statements. This is the only change that affects you.

Our production system is state of the art system from Kodak. It stands alone & is not part of the new business system. You can continue to expect & receive the same high quality you have always gotten from Pacific Color Lab.
